

Fast, easy, anywhere:

3 reasons to archive in the Cloud

Here is what you need to know if you are thinking about cloud archiving –

especially if you are an SAP customer.

The challenges

- 1 Paper-based processes**
create unnecessary risk.
- 2 On-premises storage**
is expensive to purchase and maintain.
- 3 Outmoded approaches**
hurt employee productivity and customer experiences.

1/3
of an average worker's day is spent looking for the information they need to complete a task
– Gartner

\$1.7M
per year wasted for every 100 employees due to inefficient data intelligence
– IDC

The solution

OpenText Core Archive for SAP Solutions

OpenText™ Core Archive for SAP® Solutions archives SAP and non-SAP content in the cloud. Gain a SaaS-based, automated archiving and data management solution to improve process efficiency and user productivity, while reducing risks and ownership costs.

The results

Explore the possibilities of OpenText cloud archiving.

1 Improve productivity
Eliminate content silos, boost efficiency, speed processes and improve user productivity with seamless access to content in its business context.

2 Lower risk
Meet compliance requirements and protect information through secure long-term storage in the cloud, governed by industry-leading security and replication practices for disaster recovery.

3 Reduce cost
Reduce TCO, refocus IT and scale to business needs with a consumption-based subscription as you decommission legacy technology and reduce on-premises data volume.

27TB
Top Belgian producer and supplier of energy, Engie Electrabel, migrated its 27TB archive to the cloud with Core Archive for SAP Solutions. The archive serves 57,000+ retrievals hourly to more than 6,000 SAP users.

“OpenText worked with us to achieve quality certification to ISO 27001 and SOC 2, assuring security, availability, integrity and customer data privacy.”

Joris Verberckmoes,
Head of Delivery and Operations,
Engie Electrabel

“The solution is helping us lower and stabilize operational costs and provide access for our customers, improving and administration.”
