

SERVICE OVERVIEW

Magellan BI & Reporting Starter Packages

OpenText Professional Services starter packages provide a rapid go-live solution using best practices and expertise

 **Accelerate** implementation

 **Enable** best practices

 **Reduced** Risk

 **Rapid** ROI

To maintain competitiveness in an increasingly competitive global market, organizations must be data-driven and gather insight from the huge amount of information that is available to them. Increasing business intelligence and reporting capabilities, and organizing themselves with the best enterprise business and intelligence platforms is critical to success. The benefits of becoming a data driven enterprise more than makes up for the effort used to get there. OpenText Professional Services helps organization achieve this goal faster and be ahead of the competition, complementing in-house skills to implement and maximize the success of a project.

With OpenText Magellan BI & Reporting (BI & Reporting), businesses can construct intuitive, secure, and scalable data visualizations that provide improved brand experiences and personalized analytics for customers, partners, and employees. Designed specifically to give users more control over their personalized business insights, BI & Reporting transforms complex data seamlessly and effectively into compelling visualizations: graphs, charts, tables, diagrams and more. With customizable features like dashboards, statements, applications, and interactive reports, the BI & Reporting Visualization Platform is accessible through any internet browser or by smart mobile devices.

OpenText Magellan BI & Reporting starter packages enable businesses to quickly and effectively develop customer-facing applications to deliver personalized insights. Following a proven approach, these packages guide in-house teams through the crucial steps of establishing the overall analytics application development framework and assist with the implementation of the initial OpenText™ Magellan BI & Reporting application.

Accelerate implementation

Experienced OpenText Professional Services consultants will aid the business in meeting their initial report, dashboard or HTML5 visualizations development objectives.

Best practice advice

Working closely with the business' development team, OpenText consultants ensure the optimal use of Magellan BI & Reporting to address business requirements. Their familiarity with key components and capabilities, as well as understanding of best practices in the planning, design, and implementation of BI & Reporting based solutions help ensure success.

Reduce risk

Highly proficient OpenText consultants in the Magellan BI & Reporting platform will reduce risks in implementation, development, and deployment.

Rapid return on investment

OpenText consultants have access to the collective knowledge and best practices of more than 1,000 implementations. They share the goal of making OpenText customers successful in their mission-critical projects and will help customers get the most from their investments by leveraging best practices and tools.

The Professional Services Magellan BI & Reporting Starter Packages
